

Biomes!

What is a Biome?

Biomes are places of the world with the same Weather and Temperature as well as animals and plants.

What Animals live here?

THERE ARE

5

Biomes

Aquatic!

Aquatic means "life in water" and the Aquatic biome is the biggest of all because water covers most of the earth , animals that can live in a ocean lifestyle live in the aquatic biome's , Fish are the biggest amount of animals that live in aquatic lifestyle

What kind of fish live in our river?

Desert!

It only rains twice a year in the desert!

Has some Trees and Shrubs including the cactus!

Fun Fact:

A camel actually stores water in his hump for the camel to live in the hot temperatures

What kind of animals do you think live in the desert?

Forest!

The Forest is a wildlife area for many animals , it covers 1/3 of our land on earth

There are many different types of tree's in the forest such as Spruce and Oak trees and of course maple!

What kind of animals do we see in the forest that surrounds us?

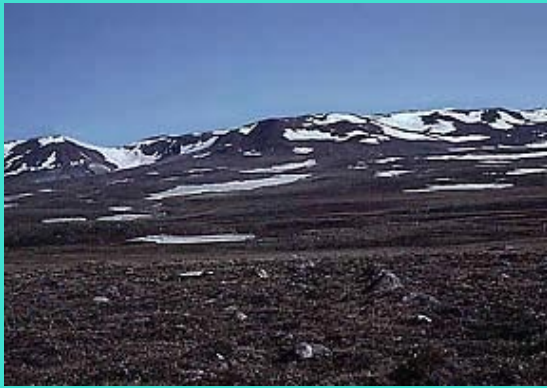

Grassland's!

Unlike the Forest , Grassland's instead of having large amount of tree's have large amounts of grass and plants spreading throughout!.

Animals that live in Grassland's include mice, groundhog's , squirrels and snake's

Tundra!

The Tundra biome is the coldest of all of the biomes and there are little to no plants , the weather is cold and only animals that can live in cold weather are able to adapt and have a life in this biome

What animals do you think live in the Tundra biome?

Questions!

How many total Biome's are there? A) 3 B) 6 C) 5

What Biome is very cold all year round A) Forest B) Tundra C) Grasslands D) Aquatic

What Biome only rain's twice a year? A) Tundra B) Desert C) Aquatic D) All Biomes

Match the Animal to the Biome!
