

## Curriculum Outcome

**M1 Demonstrate an understanding of the Système International (SI) by describing the relationships of the units for length, area, volume, capacity, mass and temperature.**

**M2 Demonstrate an understanding of the Imperial system by: describing the relationships of the units for length, area, volume, capacity, mass and temperature.**

**M3 Solve problems, using SI and Imperial units, that involve linear measurement using estimation and measurement strategies.**

Student Friendly: The relationship between measurement units such as

$$1 \text{ m} = 1.0936 \text{ yd}$$

$$1 \text{ m} = 3.2808 \text{ ft}$$

$$1 \text{ mi} = 1.6093 \text{ km}$$

$$1 \text{ in} = 2.54 \text{ cm}$$

# Warm Up

A wallpaper border is to be pasted halfway up the wall around a child's bedroom.

- What is the total length of border needed?
- The border is purchased in 12-ft. rolls. How many rolls are required?
- Each roll of border costs \$12.49. How much will the border cost, before taxes?

**13.** The tallest structure in Canada is the CN Tower in Toronto. It is 553.3 m tall. The tallest structure in the United States is the Willis Tower, previously known as the Sears Tower, in Chicago. It is 1451 ft. tall.

a) Determine the height of the CN Tower in feet and the height of the Willis Tower in metres.

b) How much taller is the taller structure?

**Example 2** Converting between Miles and Kilometres

After meeting in Emerson, Manitoba, Hana drove 62 mi. south and Farrin drove 98 km north. Who drove farther?

 **SOLUTION** Since  $99.2 \text{ km} > 98 \text{ km}$ , Hana drove farther.

1. A low bridge has a posted maximum vehicle height of 7'6". Your truck is 2.3 m high. Will it fit under the bridge?
2. A wooden dowel is 0.75 m long. What is its length in centimetres? In inches? You need to record the length of the dowel on a sketch for a carpentry project. Which unit of measurement will you choose to label the sketch with, and why?
3. Valerie wants to apply for a driver's licence. The application asks her to state her height in cm. Valerie is 5'8" tall. What is her height in cm?
4. Sandy has been asked to give an estimate for replacing a countertop in a client's kitchen. The countertop measures 2' x 6' and the client wants Sandy to install 4" x 4" tiles that cost \$3.50 each. Sandy has estimated her labour charge will be \$350.00. What is the total cost of tiles and labour?
5. Moncton Recreation, Parks and Culture wants to install grass sod on a playground that measures 20 m x 40 m. Two companies have bid on the job. Company A's bid was \$4.00/yard<sup>2</sup> installed. Company B put in a bid of \$2.50/m<sup>2</sup> plus \$2000.00 for installation. Which company should get the job based on the best price?

8. Dejan was hired to lay vinyl flooring in the kitchen, meeting room, and foyer of the local Friendship Centre. He used the measurements in the diagram below to estimate the job. The flooring material comes in rolls 10 ft wide and is sold by the running foot, and Dejan needs to purchase enough flooring to ensure the pattern will match in all three rooms. He will also add 15% to his order to compensate for wastage. One running foot of vinyl flooring costs \$12.50. Dejan estimates his labour charge will be \$560.00. What is the total estimate for vinyl flooring and labour?
