

**FileHippo - Google SketchUp (beta)**

File Edit View Camera Draw **Google SketchUp Assignment**

Build a 10 – 15 minute SMART Notebook lesson around the building/landmark you created for with Google Sketchup. In addition to your 3D Google Sketchup illustration, include in your lesson the following:

- An embedded video
- An audio/sound file that required the use of Audacity
- An interactive activity from the Lesson Activity Toolkit
- At least one new feature from Notebook 11
- A final evaluation question to which we can respond with the SMART Responders

Your lesson should engage us in learning something interesting about the building/landmark you have chosen. It could be something about its history, interesting facts, etc.

You also have the option of choosing a building/landmark other than the one you have already created for Google Sketchup. However, if you do this you must do another Sketchup illustration of your new selection.
