How are Species listed "at risk"?

Definitions are:

Extinct - a species formerly indigenous to Canada that no longer exists anywhere.

Extirpated - a species no longer existing in the wild in Canada but occurring elsewhere in the world.

Endangered - a species threatened with imminent extinction or extirpation throughout all or a significant portion of its Canadian range.

Threatened - a species likely to become endangered in Canada if the factors affecting its vulnerability are not reversed.

Vulnerable - a species particularly at risk because of low or declining numbers, small range or for some other reason, but not a threatened species.
