

**Period 2:****COOP 120**

9:40 am – 10:40 am

\* This class is up on the second floor down by K. MacDonald's and C. Matheson's rooms.

- Record attendance on class list.
- These students are working on different builds...they know the drill!
- Jared/Ty/Nolan/Tymek/Chelsea can continue working on the 3D printer assembly/build. They can use the a netbook to follow online instructions. Jordan/Greg can continue to work on Open ROV...test motors, read operation manual and customize controls (borrow power cord from K. MacDonald and have them to sign into laptop). Daven can explore UNB's Redbot site (link on webpage)...load code onto a Redbot and test. Candace/Julia can finish Tetris plans and decide on poster medium. Get Nolan's image and edit to be enlarged. David/Connor need to finish up with sparkfun lab #15 and then can work with Redbot like Daven from UNB site.
