 **Nature's Perfect Predators - Komodo Dragon**

Parasitism

- An organism that lives on another organism and feeds on the other organism is a **parasite**
- The organism that provides the nourishment is the **host**
- Ex. Ticks, fleas, tapeworms, sea-lice

Uploaded on Apr 27, 2009

A parasitic wasp has injected her eggs into a caterpillar
-- and now they're ready to hatch.

Mutualism

- A close relationship between two species in which each species provides a benefit to the other
- Ex. Humans and certain types of bacteria in the intestines
 - Humans are better able to digest food and bacteria have a place to live

Commensalism

- A relationship in which one species benefits and the other species is neither harmed nor helped
- Ex. Sharks and remoras
 - Sharks are unharmed and fish are able to eat what the shark doesn't

Symbiosis and Coevolution

- A relationship in which two organisms live in close association is called **symbiosis**
 - Symbiosis is often used to describe at least one species benefiting from another
 - Over time, the species may **coevolve**
 - They develop adaptations that reduce the harm or improve the benefit of the relationship

The image shows a screenshot of a YouTube video player. The video title is "Symbiosis" and it is by Mark Drollinger, who has 55 videos. The video has 11,466 views, 45 likes, and 2 dislikes. The player interface includes a progress bar at 0:02 / 2:31, a play button, a volume icon, and various settings icons. Below the video, there is a "Like" button, a "Subscribe" button with 1,573 subscribers, and links for "About", "Share", and "Add to".
