

# WARM-UP...

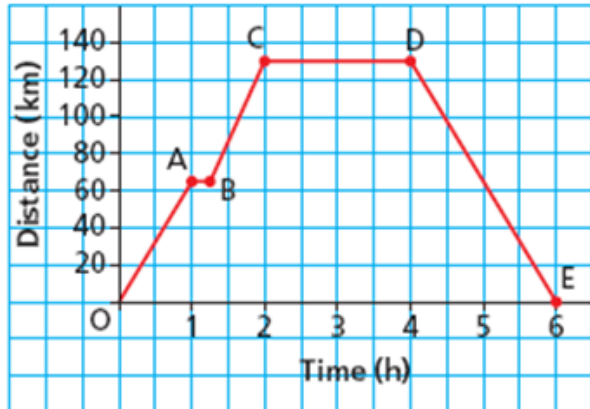

$Speed = km/hr$

Describe the journey for each segment of the graph.

The distance between Winnipeg and Winkler is 130 km.

- Start  $\rightarrow$  A: drove 65km in 1 hour
- A  $\rightarrow$  B: stopped for 15min
- B  $\rightarrow$  C: drove 65km in 45min
- C  $\rightarrow$  D: stopped for 2 hours
- D  $\rightarrow$  E: Went home 130km in 2 hrs

Day Trip from Winnipeg to Winkler, Manitoba

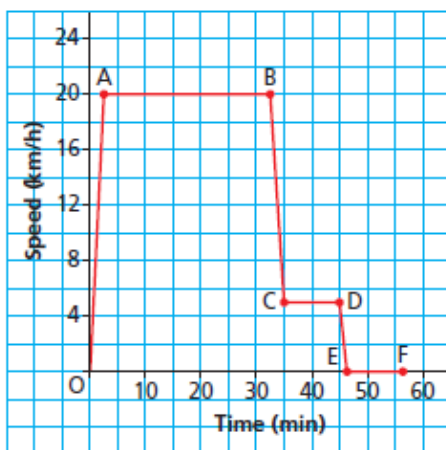

## EXAMPLE:

Construct  
The Graph!!!

Samuel went on a bicycle ride. He accelerated until he reached a speed of 20 km/h, then he cycled for 30 min at approximately 20 km/h. Samuel arrived at the bottom of a hill, and his speed decreased to approximately 5 km/h for 10 min as he cycled up the hill. He stopped at the top of the hill for 10 min.

Sketch a graph of speed as a function of time. Label each section of the graph, and explain what it represents.

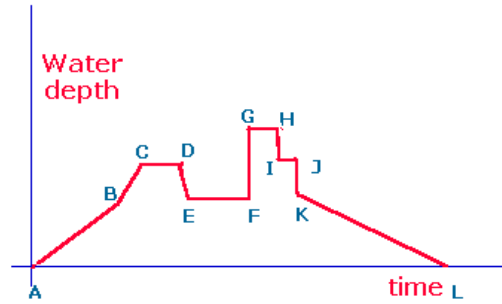

Samuel's Bicycle Ride

Segment	Journey
OA	Samuel's speed increases from 0 to 20 km/h, so the segment goes up to the right.
AB	Samuel cycles at approximately 20 km/h for 30 min. His speed does not change, so the segment is horizontal.
BC	Samuel's speed decreases to 5 km/h, so the segment goes down to the right.
CD	Samuel cycles uphill at approximately 5 km/h for 10 min. His speed does not change, so the segment is horizontal.
DE	Samuel slows down to 0 km/h, so his speed decreases and the segment goes down to the right.
EF	Samuel remains stopped at 0 km/h for 10 min, so the segment is horizontal.

Based upon the graph below, answer the following question with as many details as you can justify from the graph.

- AB: Fill Tub
- BC: Cat fell in (unwillingly)
- CD: Cat in tub
- DE: Cat Climbs out
- EF: Picking out cat hair
- FG: Fred + Sally got in tub
- GH: Bath time

Tell the Story...

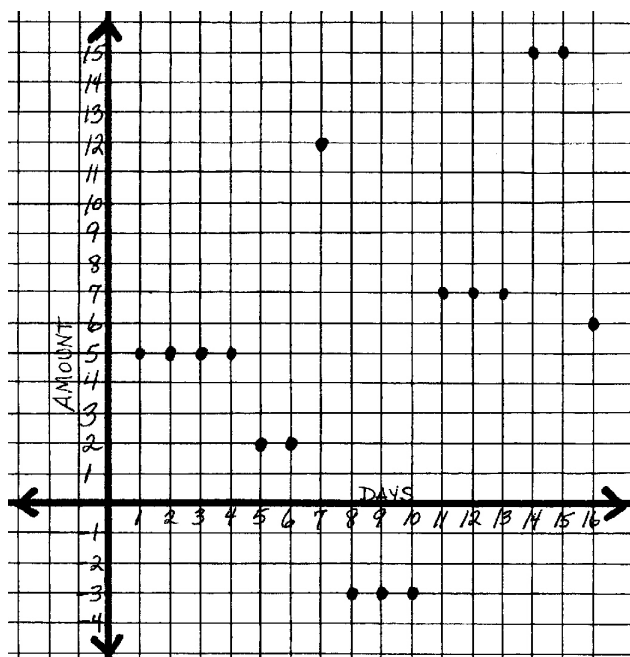

If the tub is filled during AB, describe what happens in the rest of the segments (BC, CD, etc.).

- HI: Fred got wrinkly so he got out
- IJ: More bath time
- JK: Sally got out
- KL: Drain the tub; cat hair tall.

Graph Story  
8<sup>th</sup> Grade Open Response Question

**THE PROBLEM**

Look at the mystery graph given below. Write a story to describe the data shown on the graph.

You can make the amount be what ever you would like..be creative!

I will be looking for you to share your story!

Here is what was considered a distinguished response...pretty good for grade 8!!

## 8<sup>th</sup> Grade Open Response Question Distinguished Response

Charlene started the week with no money, but found \$5.00 in her coat pocket on Monday. On Friday after school she spent \$3.00 for a paperback book, leaving her with a balance of \$2.00. On Sunday she earned \$10.00 by doing yard work for her neighbor. The balance on Sunday was then \$12.00. On day 8, Monday, Charlene's friend, Sharee, called and asked if she wanted to go to the music store to buy the latest 'nSync CD. Since the CD cost \$15.00 and Charlene only had \$12.00, Sharee offered to loan her the money. Charlene took the loan, which left her with a negative cash balance of \$3.00. On day 11, Thursday, Charlene earned another \$10.00 by doing yard work and had \$7.00 left after paying her \$3.00 debt to Sharee. On day 14, Sunday, Charlene earned another \$8.00, giving her a new cash balance of \$15.00. On day 16, Tuesday, Charlene went to the mall with Sharee and spent \$9.00 for a sparkly pen and writing notebook. Her final cash balance on day 16 was \$6.00.
