

Sally has an annual salary of \$42 330 and she is paid biweekly. She has the following deductions: union dues \$11.50, pension, \$295.00, medical \$23.49 and dental \$35.34. What is her net pay if she has a claim code of 4.

tables

Gross Pay	\$1628.08
-Pension	295.00
-Union Dues	11.50
Taxable Income	\$1321.58
C.P.P.	73.93
E.I.	27.03
Fed tax	78.50
Prov tax	62.50
Medical	23.49
Dental	35.34
Net Pay	1020.79

$$\begin{aligned} & \$ 42\,330 / 26 \\ & = \$ 1628.08 \end{aligned}$$

Calculating Net Pay

<u>Gross Income</u>	\$3375.46
Union Dues	- 38.00
Pension	-394.92
<u>Taxable Income</u>	\$2942.54
C.P.P.	- 160.42
E.I.	- 56.03
Federal Tax	- 409.40
Provincial Tax	-302.95
Other deductions	- 114.70
<u>Net Pay</u>	\$1899.04

Mrs. Sears has an annual salary of \$87 762. She is paid biweekly using claim code 1 and her deductions are: pension \$394.92, union dues \$38.00, car insurance \$80.47 and medical \$34.23. What is her net pay?

$$\$87\,762 / 26 = \$3375.46$$

$$\left\{ \begin{array}{l} 87762 - 3500 = 84262 \\ \underline{84262 \times 0.0495 = \$160.42} \\ 26 \end{array} \right\}$$

$$3375.46 \times 0.0166 = \$56.03$$

<u>Gross Income</u>	\$1686.88
Union Dues	- 9.95
Pension	- 125.07
<u>Taxable Income</u>	\$1551.86
