

WARM-UP...

Ask yourself...

1. What am I given?
2. What am I trying to find?

EXAMPLE...

On a space flight, astronaut Neil Armstrong reports that the angle formed by his lines of sight to the earth and to the moon was 58° . At the same time, the observer on the earth reports that the angle formed by her lines of sight to the spaceship and to the moon is 74° . If the moon is 382 000 km from the earth, how far is the spaceship from the tracking station?

HW Questions

10.9

3a)

$$\angle A = 85^\circ$$

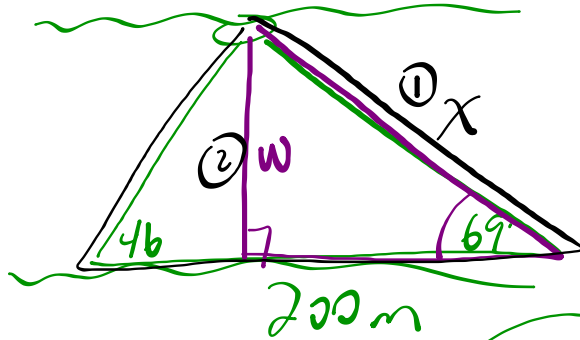

$$\frac{a \sin 85^\circ}{\sin 85^\circ} = \frac{60.3 \sin 85^\circ}{\sin 64^\circ}$$

$$a = 66.8$$

$$\frac{b \sin 31^\circ}{\sin 31^\circ} = \frac{60.3 \sin 31^\circ}{\sin 64^\circ}$$

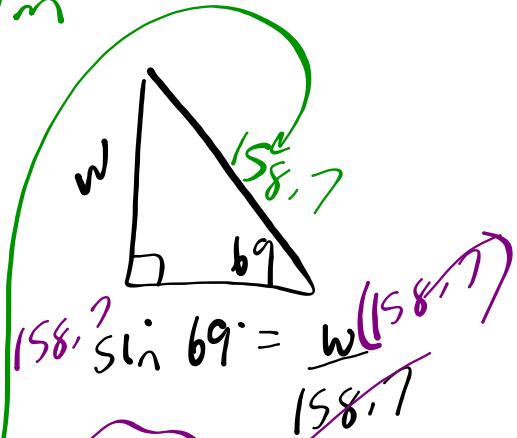

$$b = 34.6$$

10.10
#3

$$\frac{x \sin 46^\circ}{\sin 65^\circ} = \frac{200 \sin 46^\circ}{\sin 65^\circ}$$

$$x = 158.7$$

$$158.7 \sin 69^\circ = \frac{w(158.7)}{158.7}$$

$$148.2m = w$$

OR

$$\frac{w \sin 69^\circ}{\sin 69^\circ} = \frac{158.7 \sin 69^\circ}{\sin 90^\circ(1)}$$

$$w = 148.2m$$

Announcements for Monday March 14, 2011

Larry Shaw
[Founder of PI Day]

PI DAY facts...

- Founder: Larry Shaw (physicist)
- started in 1988
- San Francisco Exploratorium
- (2004) Daniel Tammer recited 22 514 decimal places
- US House of Representatives declare National PI Day in 2009

March 14, or 3/14 as its written numerically, is a day to celebrate Pi. Those who are looking to be more exact celebrate Pi Minute (March 14 at 1:59 pm) or Pi Second (March 14, March 14 at 1:59 pm and 26 seconds).

March 14
at
1 : 59 : 26

$$\pi \approx 3.14159265358979 \dots$$

The *ultimate* “pi day” occurred on

Fractional PI Day is July 22nd ...

[22/7 when written in day/month format]

22/7
CASUAL PI DAY
JULY 22
PI APPROXIMATION DAY

Celebrate *PI* again???

http://www.mathematicianspictures.com/PI/CASUAL_PI.htm

What is PI???

By definition, pi is the ratio of the circumference of a circle to its diameter. Pi is always the same number, no matter which circle you consider. Unlike a number like 9.876 that has a finite number of nonzero digits to the right of the decimal point, pi has infinitely many digits to the right of the decimal point—and they never repeat.

Pi is a very “old” number. The Old Testament alludes to a value of 3 for pi in 1 Kings 7:23 (probably suggesting just an estimate). The ancient Egyptians and the Babylonians knew about the existence of the constant ratio pi. They figured out that it was a little larger than 3. The Babylonians had an approximation of $3\frac{1}{8}$ (3.125); the Egyptians used $4\cdot(8/9)^2$ (about 3.160494).

Pi (rather than some other Greek letter) was chosen as the letter to represent this ratio because the letter π in Greek stands for “perimeter.”

Pi Day Jokes

Q: What do you get when you cut a jack o'lantern by its diameter?

A: Pumpkin Pi!

Q: What do you get when you take green cheese and divide its circumference by its diameter?

A: Moon Pi.

Q: What do you get when you take the sun and divide its circumference by its diameter?

A: Pi in the sky.

Mathematician: Pi r squared

Baker: No! Pies are round, cakes are square!
