 French proverb

Calculate the missing side or angle indicated. Round angles to the appropriate number of significant digits. Place the circled letter of the question in the blank above the correct answer in the quotation.

11. From the top of a cliff 30 m high, the angle of depression of a sailboat on the water is  $22^\circ$ . How far is the boat from the cliff? (T)
12. The roof lines of a ski chalet make angles of  $26^\circ$  and  $73^\circ$  with the horizontal. The shorter roof line is 3.4 m long. Find the length of the other roof line. (H)
13. Find the largest angle in a triangle with sides of 11, 12 and 13 cm long. (E)
14. Two ships leave a port sailing 17 km/h and 21 km/h. The angle between their directions of travel from the port is  $38^\circ$ . How far apart are the ships after 2 h? (O)
15. A tree casts a shadow 23.2 m long when the angle of elevation of the sun is  $47^\circ$ . Find the height of the tree. (A)
