

Find the measure of angle A. Provide reason for your work.

$$\begin{aligned}
 2x - 1 + 5x + 3 &= 180^\circ && \text{CIA} \\
 7x &= 180 - 3 + 1 \\
 7x &= 178 \\
 x &= 25.4 \\
 A &= 5x + 3 \\
 &= 5(25.4) + 3 \\
 &= 127 + 3 \\
 &= 130^\circ
 \end{aligned}$$

$$\begin{aligned}
 3x - 10 &= 2x + 5 && \text{AEA} \\
 3x - 2x &= 5 + 10 \\
 x &= 15 \\
 A &= 2x + 5 \\
 &= 2(15) + 5 \\
 &= 30 + 5 \\
 &= 35^\circ
 \end{aligned}$$
