

Parallel Lines and Their Angles

1. Name two pairs of alternate interior angles.

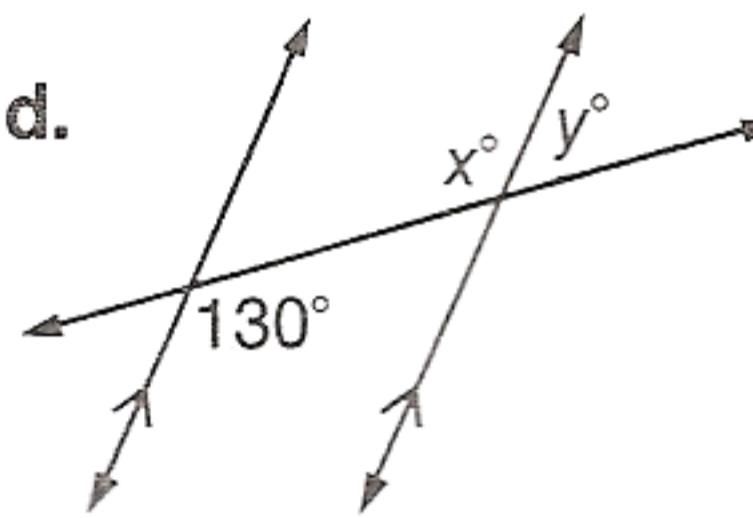

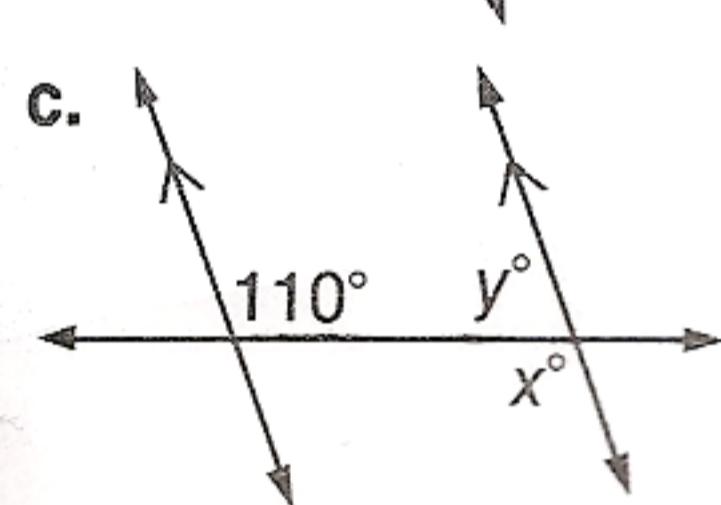

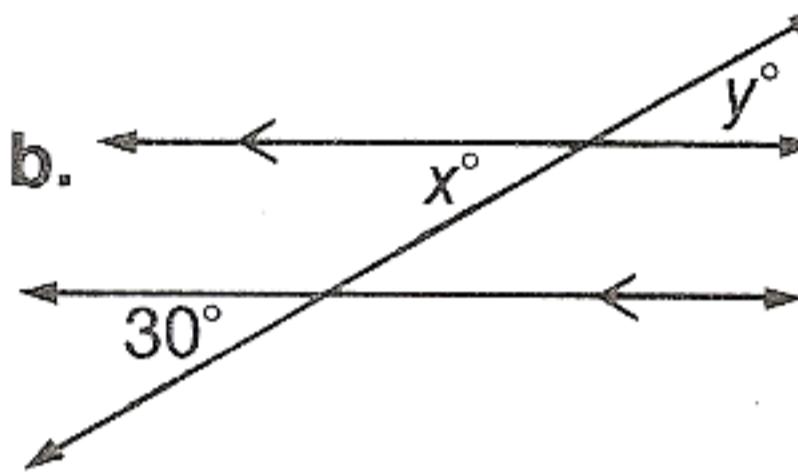

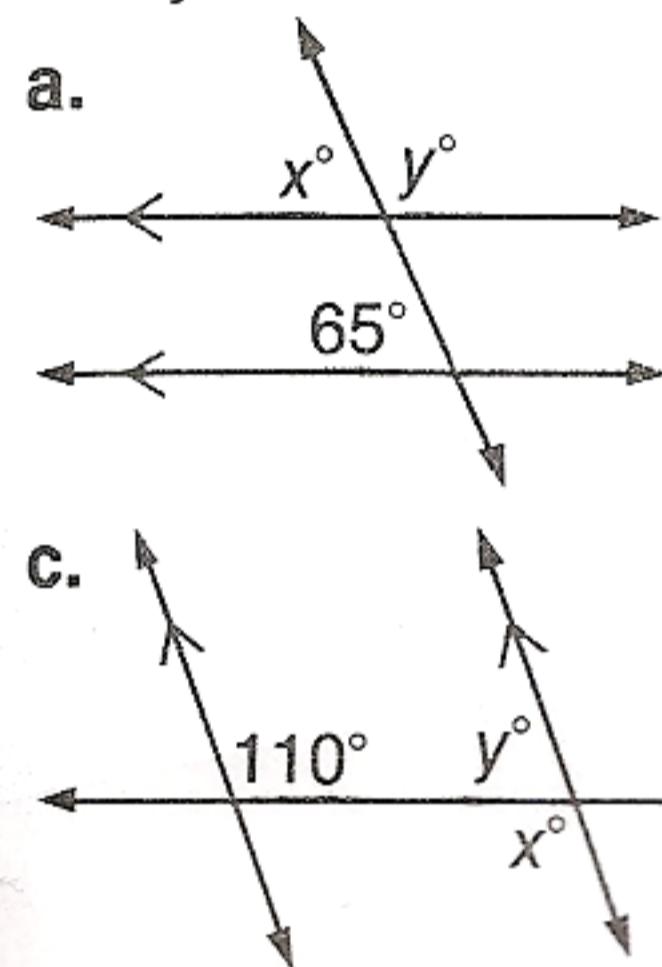

4. Calculate the measure of the angle.

- a. $\angle BCH$ b. $\angle ABF$ c. $\angle HCD$
 d. $\angle EBD$ e. $\angle GCD$ f. $\angle FBD$

2. Name four pairs of corresponding angles and two pairs of co-interior angles in each part of exercise 1.

3. Calculate the unknown angle measures x° and y° .

5. Calculate the unknown angle measures x° and y° .
