

Mitosis/Meiosis Review

1. Watch the video recording of the lesson if you think you have missed anything.
2. Review the cell cycle for mitosis
3. Review the diagrams for the stages of mitosis
4. Understand the importance of the cell cycle and cell division
5. Practice sheet with meiosis diagrams, there will be several questions from this work
6. Go over the case study from the unit
7. You should be able to draw and explain what happens in any nondisjunction disorder that has been discussed in class. There are examples of each disorder in the unit notes and on the video review mp4
8. Differences between mitosis and meiosis
