### Do's & Don'ts Website Design

1. Common font size for headings (bigger)
2. Smaller font for text
3. Skip lines between paragraphs
4. Organized links
5. Warm & cool colors
6. Not all caps or underline
7. Don't overuse Bold
8. Links should be descriptive, not click here for my pictures
9. No pictures off the internet - use free ones if need be.

Page Layout makes a big difference.

Make use of columns and put pictures beside text rather than above and below with a lot of white space.
