

Music 120

This week we are going to try something “practical”. Since only one of you has an instrument at home with you, I would like you to create your own instrument that you can play. Are you handy and have scraps of wood around? Can you make a box drum? Do you have empty ice cream containers that you can make a mini drum kit or shakers with? How about homemade bagpipes with a garbage bag and recorders? How about vegetable instruments? What can you make with a carrot or potato? Kleenex boxes? Paper towel rolls? All are acceptable.

You have two weeks to work on this. I would like pictures of you making your instrument and video of you playing it. No, I won't show anybody or post it anywhere.
