

Nervous System Test Review

In a flow chart, list all the divisions of the nervous system with their functions (In other words, replicate the flow chart of the nervous system on slide 30)

Function of CNS and PNS

State the 5 essential components of the reflex arc and state their functions

Resting cell membrane/polarized, depolarized membrane, repolarization and the refractory period.

Function of the sodium/potassium pump

Parts of the brain including the cerebrum, cerebellum, and medulla oblongata

Parts of the eye and function(May be a fill in the blanks....), cornea, pupil, iris, lens, retina, optic nerve and words associated with their function.

Nearsighted and farsighted, explain, use proper terminology.....myopia is nearsighted..... and so on

Go over all questions that were completed in class

Go over all questions from the reflex lab

Lobes of the brain and function

Stroke Patients

Stroke-causes, effects on the body, and the potential to heal

Fill in the blanks....terms for the unit

Polarized membrane

Sodium potassium pump

Threshold levels

Dendrite

Axon

Refractory period

Acetylcholine
